Securiclاد

The high security modular composite wall panel system to LPS1175 SR3 and SR4 rating

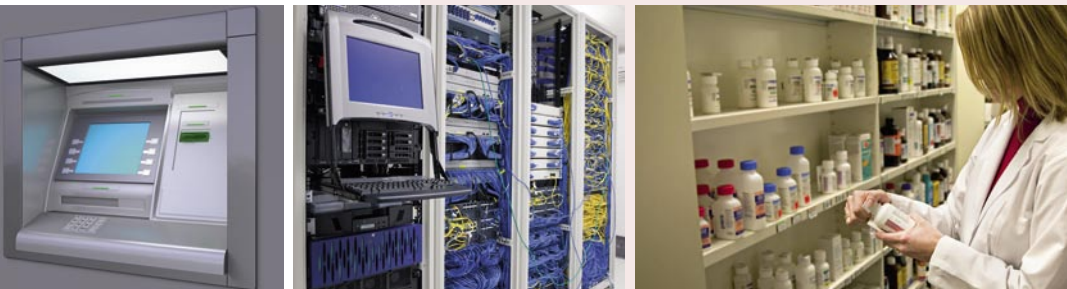

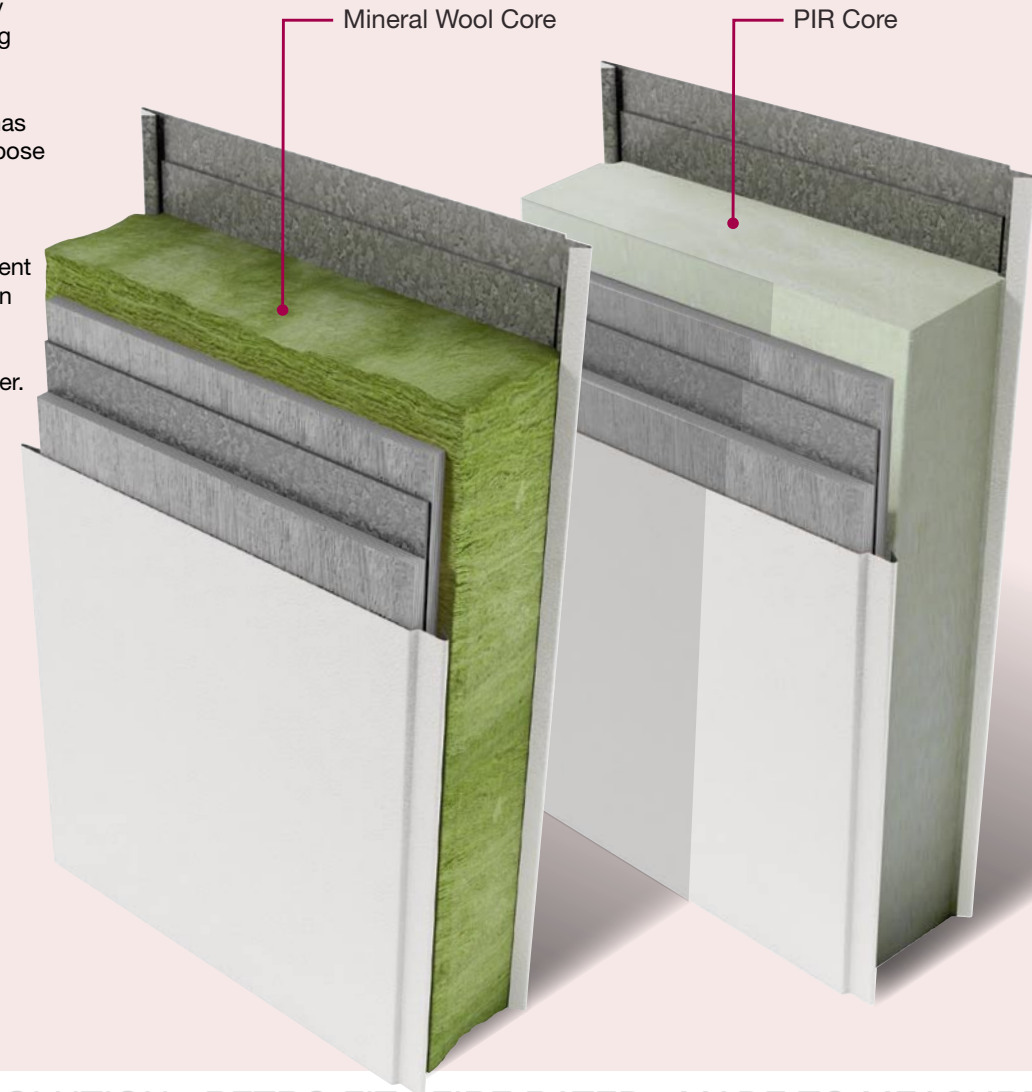

Approved by  HM Government

A Safe and Secure Option

With the rising threat of terrorism and the increased activity of theft, demand for security products has escalated driving up security standards.

In response to this growing demand the HM Government has tried to ensure that there is a sufficient supply of fit for purpose security products to meet demand predicted over the next few years.

Our **Securiclاد** panel has been approved for HM Government use and has passed rigorous testing by the Loss Prevention Certification Board, achieving LPS 1175 Security Rating 4. This security rating applies to our system being the prime barrier and can be an option as an internal secondary barrier.

MADE TO MEASURE · QUICK FIX SOLUTION · RETRO FIT · FIRE RATED · MADE TO MEASURE

Modular storage for sensitive data

Securiclad modular system offers a 'retro-fit' design and 'quick-fix' solution for your needs.
Securiclad is available in a range of colours, as well as a 'bespoke' option for corporate colours

A Secure System Easy To Install

Like our existing composite panel, installation of this **Securiclad** system is simple and efficient.

The panel system offers a method of construction that is significantly faster and simpler to install than conventional methods.

- **Quick - fix solution**
- **'Enclosure' or partition wall**
- **Concealed security**
- **Retro - fit design**
- **Easy upgrade**
- **No 'wet' trades**

Excellent Performance Under Rigorous Testing

Securiclad underwent indicative testing in September 2009 by BRE in Watford to attain a 'solution', achieving LPS 1175 SR4 at the first attempt.

In January 2010, following extensive testing at Isoclad Ltd carried out by the BRE, **Securiclad** was destructively tested as a system and achieved SR4 rating. With the combination of materials positioned accurately and manufactured into a composite panel, Securiclad offers an intruder resistant prime barrier.
